README

T-NSA-800: DESCRIPTION

Characteristic	Value
Project's name	SLA
Suggested Team size	3-4 students
Theme	devops
Suggested tool	docker, prometheus, grafana, pgsql
Suggested language	
Specific hardware needed	no
Specific resources needed	cloud infra provided

- Pitch

- **Short edit:**

- Train, test and demonstrate your devops skills.

- **Long edit:**

- Clients, interested in your profile, are going to test your skills with an infrastructure mimicking theirs on a public cloud service. You'll have a time to discover this infrastructure, then you will prove them you're able to monitor some metrics, be reactive on incidents, guarantee a high-disponibility service, suggest improvements, ...
